

First Aid in the Workplace Guide

*Our specialty is ensuring your compliance obligations are fulfilled and making
First Aid in your workplace simple and easy.*

First Aid In The Workplace

Do you have a duty to provide first aid?

Under the Work Health and Safety Regulations (WHS) a person conducting a business or undertaking at a workplace (PCBU) must ensure the workplace is well equipped with first aid equipment and facility for administering first aid that is easily accessible to each worker. It is also essential that workplaces have adequate number of workers that are trained to administer first aid or workers having access to trained first aid officers.

What first aid is required for my workplace?

Deciding what first aid arrangement needs to be provided in the workplace is determined by legislative requirements and through a risk assessment taking into account the type of work performed, workplace size and location, as well as the number of people on site.

Identifying all reasonably foreseeable hazards and understanding the level of risk associated with those hazards will help you decide what first aid equipment, facilities and services you need. This process is known as risk management* and involves the following four steps:

1. Identifying hazards that could result in work-related injury or illness
2. Assessing the type, severity and likelihood of injuries and illness
3. Providing the appropriate first aid facilities and training, and
4. Reviewing your first aid requirements on a regular basis or as circumstances change.

Scheduled Maintenance

Accidental can schedule regular visits to your site to maintain and restock your First Aid Kit so you are always prepared in the event of an emergency and you are meeting your requirements for regular maintenance and review as outlined in the Code of Practice. Visits can be as often as every month, quarterly or half yearly.

For further information regarding the Work Health and Safety Regulations and Code of Practice, please contact your State or Territory, work health and safety authorities. For news updates please visit ahsworksafety.com.au.

Our Accidental Health and Safety First Aid Kits

At Accidental, we make it easy for you to decide which First Aid Kit is required for your site. Our Workplace First Aid Kits modules are available for a wide variety of industries – making First Aid compliance easier for your workplace. Our Industrial First Aid Kits feature a Treatment Rating system that allows our users or First Aider's to quickly identify which products to use in an emergency.

Accidental's First Aid kits are designed with our users on mind, making applying First Aid easy, simple and effective!

Risk Guide Legend

To assist you in selecting a first aid kit suitable for your workplace, we have designed a risk guide legend to help you identify the kit suited to your level of workplace risk.

Low risk workplace means a workplace where workers are not exposed to hazards that could result in serious injury or illness such as offices, shops or libraries. Potential work-related injuries and illnesses requiring first aid would be minor in nature.

High risk workplace means a workplace where workers are exposed to hazards that could result in serious injury or illness and would require first aid. For example, factories, construction sites, mobile plant, motor vehicle workshops and forestry operations.

RISK GUIDE

Kit contents may vary from photos shown in this catalogue depending on model selected and component availability at time of manufacture.

Workplace First Aid Check List

Step 1 – Identify potential causes of workplace injury and illness

Certain work environments have greater risks of injury and illness due to the nature of work being carried out and the nature of the hazards at the workplace (see examples right).

Low Risk Workplace

(Minor Injuries or Illness)

- Offices Shops
 Libraries Other

High Risk Workplace

(Serious Injuries or Illness)

- Factories Electrical Work Construction
 Mining Workshops Security
 Outdoor Work Food Prep.

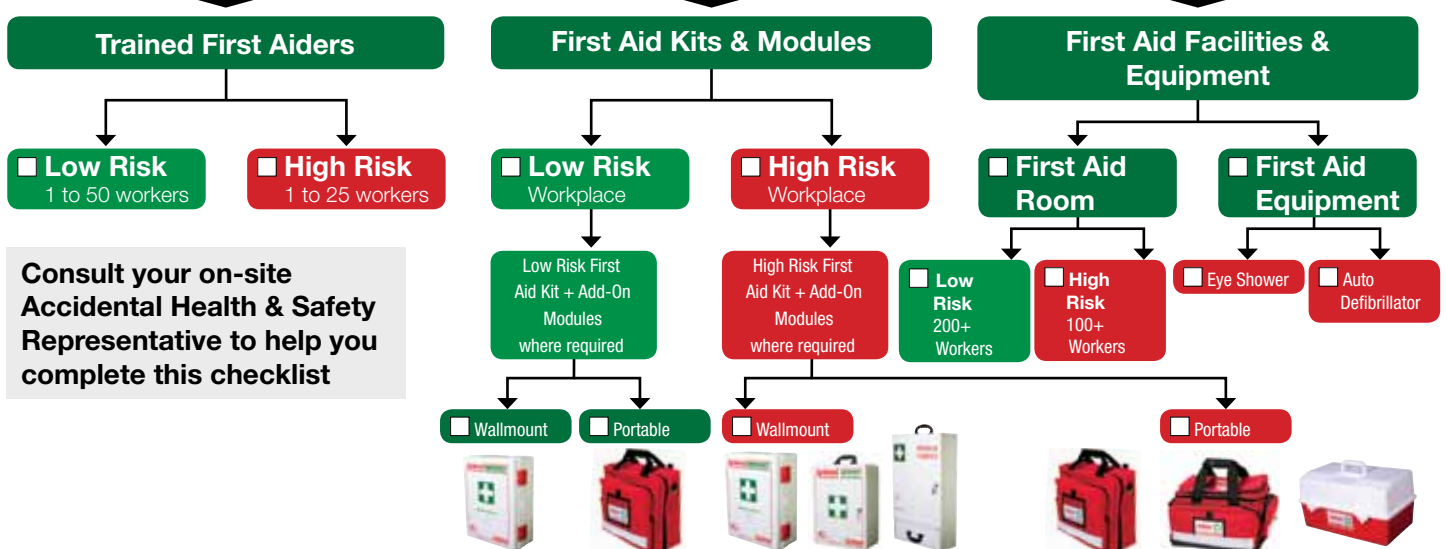

Step 2 – Assess the risk of workplace injury and illness

Examples of Injuries associated with common workplace hazards that may require first aid		Not Likely (Low Risk)	Likely (High Risk)	Module
Manual tasks	Overexertion can cause muscular strain.	<input type="checkbox"/>	<input type="checkbox"/>	100349B Sprains & Strains
Working at heights	Slips, trips and falls can cause fractures, bruises, lacerations, dislocations, concussion.	<input type="checkbox"/>	<input type="checkbox"/>	101490B Trauma Module
Electricity	Potential ignition source could cause injuries from fire. Exposure to live electrical wires can cause shock, burns and cardiac arrest.	<input type="checkbox"/>	<input type="checkbox"/>	100346B Burns Module
Machinery and equipment	Being hit by moving vehicles, being caught by moving parts of machinery can cause fractures, amputation, bruises, lacerations, dislocations.	<input type="checkbox"/>	<input type="checkbox"/>	101490B Trauma Module
Hazardous chemicals	Toxic or corrosive chemicals may be inhaled, contact skin or eyes causing poisoning, chemical burns, irritation. Flammable chemicals could result in injuries from fire or explosion.	<input type="checkbox"/>	<input type="checkbox"/>	100346B Burns Module 100347 Eye Module
Extreme temperatures	Hot surfaces and materials can cause burns. Exposure to heat can cause heat stress and fatigue. Exposure to extreme cold can cause hypothermia and frost bite.	<input type="checkbox"/>	<input type="checkbox"/>	100346B Burns Module 101489B Outdoor Module
Radiation	Welding arc flashes, ionizing radiation and lasers can cause burns.	<input type="checkbox"/>	<input type="checkbox"/>	100346B Burns Module 100347 Eye Module
Violence	Behaviours including intimidation and physical assault can cause nausea, shock and physical injuries.	<input type="checkbox"/>	<input type="checkbox"/>	101487 Wound Care 101490B Trauma Module
Biological	Infection, allergic reactions.	<input type="checkbox"/>	<input type="checkbox"/>	101490B Trauma Module
Animals	Bites, stings, kicks, scratches.	<input type="checkbox"/>	<input type="checkbox"/>	101489B Outdoor Module
Remote Locations	For workers working remotely or away from first aid facilities.	<input type="checkbox"/>	<input type="checkbox"/>	101491B Remote Module
Food Preparation	Cuts and lacerations in areas requiring detectable first aid products to meet Food Standards recommendations.	<input type="checkbox"/>	<input type="checkbox"/>	101488B Food Prep Module
Outdoor Work	If work is performed outside and there is a risk of insect or plant stings or snake bites.	<input type="checkbox"/>	<input type="checkbox"/>	101489B Outdoor Module

Always Consider

- The size of your workforce and workplace to determine quantity of first aid kits. The location of your workplace: relevant to local medical centres Workplace incident and injury data including near misses. Regular consultation with workers and their Work Health & Safety Representative.

Step 3 – What first aid is required?

Consult your on-site Accidental Health & Safety Representative to help you complete this checklist
